

Features & Benefits

- ✕ Designed to fit into the Connectix Home cabinet
- ✕ Allow phone or data to be routed around the house
- ✕ Makes alterations simple as requirements change
- ✕ Supports high speed networks including Gigabit Ethernet

Ordering Information

Product Description	Part Number
12 Way Enhanced Cat 5 Patch Panel	009-001-016-00
3 x 4 way Voice Panel	009-003-001-01
Blank Panel	009-001-021-08

Specification

Width	10" (260mm)
Depth	1U (44mm)
Height	35mm
Finish	Black Powder coat to BS6496
Socket Labels	9mm Numbered Card
IDC Labels	Individual colour Coded labels to EIA258A/568B (Enhanced Cat 5 panel only)
Sockets	RJ45 Vertical Jacks
IDC Blocks	4 Way Industry standard IDC Blocks
PCB	4 Way 1.6mm double sided PTH boards
Conforms to	EIA/TIA-568-B Enhanced Category 5 Specification (Enhanced Cat 5 panel only)

Patch panels should be used to terminate the cabling from each of the RJ45 outlets around the home, enabling different services to be routed to any outlet.

The Connectix Enhanced Category 5 patch panels provide exceptional performance for high speed LANs including Gigabit Ethernet applications in an easy to use format. This 12 way panel consists of industry standard IDC connections and high quality RJ45 Jacks. The panel utilises the specially designed individually labelled cable saddle to facilitate easy installation and cable management. The rear of the panel features hook and loop cable retainers at either end for bundling cables. Each RJ45 port is numbered with a removable identification label protected by an acetate strip.

The Connectix voice panel comprises of 3 separate units that have a single input at the rear, which is distributed to 4 outputs on the front. This allows up to 4 extensions to share a single phone line within each of the units. The units can be connected together giving the option of 8 or 12 extensions from a single line.

The blank panel is ideal to fill any spaces not filled by the other panels.
