

Features & Benefits

- ✕ 50 voice ports in 1U
- ✕ 8-way RJ45 sockets with three pairs connected
- ✕ Analogue, Digital and ISDN systems supported

Ordering Information

Product Description	Part Number
50 Way Voice Panel	009-001-002-10

Specification

Width	19" (483mm)
Depth	120mm
Height	1U (44mm)
Material	1.5mm thick mild steel CR4 BS1449
Finish	Black Powder Coat to BS6496
Socket Labels	Silk screened blocks
IDC Labels	Pairs indicated by PIN numbers
RJ45 Sockets	2 x 5 unshielded stacked RJ45 jacks
IDC Blocks	Industry standard 4 way IDC's
PCB	1.6mm Double Sided PTH boards
Wiring Spec.	Pairs 1, 2 & 3 connected straight through. Pair 4 not connected

Cabinet space is too valuable to have it taken up by stacks of voice panels. That is why Connectix now offer a high-density voice panel packing 50 dedicated voice ports in a 1U panel.

Each 8-way RJ45 socket has three pairs connected. This ensures that the panels can be used with analogue, digital and ISDN systems. Designed to match the data panels in the Connectix range it will also accept the Connectix Cable Tidy Rings so no additional rack space gets taken up by cable management panels.
