The Connectix range of voice products provides extensive solutions for telecommunication applications.

CW1308 cable is available with 2, 3, 10, 20, 25, 50 and 100 pairs, suitable for IDC terminations. Box connections offer various capacities for voice cables. The modular designed 301A allows 100 pairs, the 251A with built in cable management for 50 pairs, 201D low profile for 20 pairs and 510 or 520 box connections with knock-outs allowing side-by-side mounting for 340 and 680 pair cables. Flush or surface mounting voice outlets in single and dual variants, with optional mixed telephone and data sockets for combined computer and telecommunication networks are available. We also stock standard telephone extension leads in various lengths. Individual 237A IDC strips are available for use in Box Conn termination applications.
