The Sterling brand of Marshall Tufflex Dado Trunking has been specifically designed for the modern office environment. Sterling is a modular system ideal for the transportation of data, communication and power.

Ideal for new buildings and refurbishments and is suitable for a wide range of applications in offices, laboratories hospitals and workshops.

The base unit features elongated holes in the back for ease of fixing. The main compartment lid clips on to the base unit and can be cut to length as required for the installation of fittings or the specially designed back boxes. The unit is completed with the angled covers that clip on to the upper and lower edges of the base unit to provide further compartments.

A complete range of corners, flat angles, bends, tees, back boxes and additional components are available to facilitate professional installation.
